KONGSBERG

Revitalizing DP CAP™

Almost 15 years has passed since the first version of DP CAP was launched, as a direct result of the initiation of the DP 2000 joint industry project.

Since then close to 6000 DP CAP exercises have been carried out, and DP related incidents have decreased considerably.

A revitalization project of the DP CAP scheme was launched in 2015 together with Teekay shipping, receiving input also from Knutsen OAS.

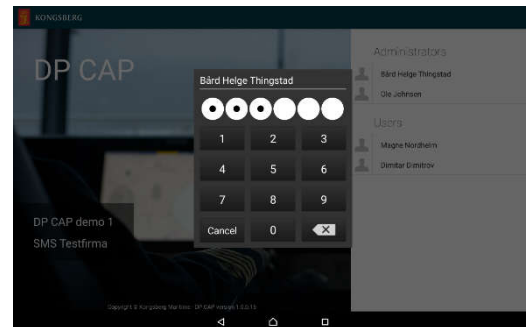

The project has led to new exercises and a new Pad based DP CAP app. New pads will be distributed to all existing DP CAP vessels.

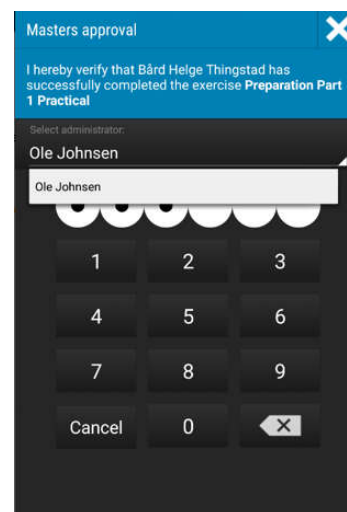

The new DP CAP tool features greatly improved graphics, user interface, exercises and functionality.

What is new?

All login to the DP CAP Tool is individual and new users are easily added by an on-board administrator.

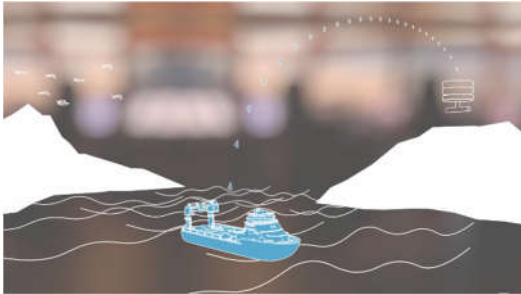

All exercises are refurbished to newer software versions, and include new animations and screenshots. Each ship can be fitted with a unique set of exercises.

The onboard administrator must approve all exercises carried out before synchronizing the content to the land-based database.

After synchronizing the exercises from the PAD to the land-based database, you can find the data again by logging into the database on www.dpcap.no.

The data may then be printed as a pdf report, for documentation purposes.

Login details to land-based database will be provided by Kongsberg Maritime on request by e-mail: km.dpcap@km.kongsberg.com

(If you have participated in Offshore Loading courses at SMSC/ KM Training, you can use the same username and password as you used during the assessment there).

New Shuttle Tanker Phase 1-3 courses

Together with a revitalization of the DP CAP, all Shuttle tanker 1-3 courses have been refurbished, in order to adapt the course contents to the new DP CAP exercises and to the DNVGL DPO certification scheme.

The course length on phase 1 and 2 courses have been reduced to 3 days, as a result of moving contents to DP CAP, and by avoiding overlap between courses.

NOTE: The requirement for attending the new 3 days courses is that the DP CAP exercises as described in the training matrix (encl.) have been completed! Please confirm that the required exercises have been carried out before registering to a 3 days course.

The new 3 days courses will be available in the KM Training course catalogue from 01.06.2018.

5 days courses for candidates NOT running DP CAP will still be available.

Any comments regarding the exercises or DP CAP scheme in general that contributes to improvements are greatly appreciated!

Best regards
