# Kongsberg cNODE Modem MiniS

KONGSBERG

Software release note

---

## Software release note

### Release 7.15

#### Improvements

- Sleep mode implemented also when connected to external 24 V supply
- Modem can wake up on serial line, also with latest FPGA version
- Fragmented messages in modem-modem communication improved

- Modem transfer of NMEA-messages improved
- The battery charger algorithm has been updated for fully charged status

### Release 7.10

#### Improvements

- Improved battery charging algorithm for 24 V external power (ROV use)
